

Normalized scores are reported here. Normalization is a statistical process allowing for the comparison of different datasets (i.e., sections) in a way that eliminates the effects of certain influences (i.e., different judges). Scores are reported as if participants were all evaluated by the same judge, when in fact they were not.

International percentile rank is reported here. The percentile rank of the normalized score is interpreted as the percentage of all participants who scored at or below the score of interest.

Category	Normal score	%ile	International		
			%ile low	med	high
Preliminary Written Entry	44	80	94		
Preliminary Oral Presentation	47	100	94		
Final Written Entry	43	NED	81		
Final Oral Presentation	43	NED	93		
Overall	91	80	96
