Collegiate DECA's **Team Case Study Events** effectively measure the student's proficiency in the knowledge and skills identified by business and industry professionals as essential to success in a given career. The team of two students is given a description of a specific situation that measures skills, knowledge and attitudes in a given career. Roles in these events could be content area expert, client, customer, employee, supervisor, manager or entrepreneur.

The guidelines for each of the Team Case Study Events have been consolidated to facilitate coordination of participant activities in each career category. This means the guidelines are exactly the same for each career category. However, each career category's case study will be career specific and will be different and distinct from the case studies of the other career categories.
